Mark Wilkinson, Managing Director

useit

We make IT simple

Established in 1997, we have **decades of skill, expertise & knowledge** providing IT services and solutions for businesses across Lancashire.

Poorly managed IT can hinder your business and prevent it from reaching it's true potential. At it's best, IT can help you grow your company more efficiently, quicker and in a more cost effective manner. Our IT services cover consultancy, infrastructure, design, installation, on-going support and more.

Backup

Protect your business from **mass data loss** with simple and secure business data backup.

Less than 10% of people backup their data every day. But, every day there's a very real chance that your data could disappear. Backing up your companies data is essential to any business. Would your business be able to survive if all of it wasn't there tomorrow, either through corruption, fire, theft or damage? We offer simple, cost effective solutions so even if the worst happens, your data will be fully restored.

Powered by | datto Acronis

> Prevention is always easier than a cure.

Benefits of data backup:

- ✓ Simple and secure
- ✓ Survive cyber attacks
- ✓ Avoid business disruption
- ✓ Data can easily be retrieved and restored

For more information on data backup, call us 01254 877009 | **www.use-it.co.uk**

Business Continuity

Business continuity and disaster recovery will help **prevent costly downtime.**

Prepare your business for the unthinkable! Business continuity and disaster recovery plans increase the chances of restarting normal business operations with minimal disruption following a disaster. We'll help you to get back to business in hours, not days.

Powered by | datto Acronis

52% of **small businesses** say it would take at least **3 months** to recover from a disaster.

- salesforce.com

Benefits of recovery plans:

✓ **Eliminates downtime**

✓ **Off site backups**

✓ **Minimal risk of corrupted backups**

✓ **Each backup is saved in multiple locations**

Telecoms

Phone systems hosted in the cloud for **flexibility and powerful** call-management features.

Give your business the tools to grow and be successful with our hosted VoIP solutions. Our specialist phone systems are loaded with great features, such as on hold messages, call recording, out of office messages, voicemail and call redirecting. But that's not all! Calls aren't just limited to voice, as users can make video calls and use instant messaging. Communications can be encrypted, plus, it's easy to customise our phone systems without the need for an engineer to visit.

Benefits of phone systems:

✓ Significantly cheaper calls than on a traditional landline

✓ Feature rich - includes call recording, out of office, call redirect and more

✓ Fully scalable

✓ Easy to set up

Cyber Essentials

Cyber attacks cost organisations **thousands of pounds** and cause lengthy periods of disruption.

Cyber Essentials is a government-backed, industry-supported scheme that helps businesses to protect themselves against cyber threats. As Internet usage grows, so do the opportunities for hackers to commit fraud, or steal intellectual property. Cyber attackers will attack any organisation that isn't properly protected, not just larger companies and banks.

A cyber essentials badge will:

✓ Protect your organisation against common cyber threats

✓ Show your customers that you take this issue seriously

✓ Enable you to bid for government contracts

CYBER ESSENTIALS

CYBER ESSENTIALS PLUS

There are two level of badges that your organisation can apply for

Regulation

useit

GDPR

If you hold data on your customers then you'll be **impacted by the GDPR**

The new rules mean you have to abide by strict protocols around the collection, storage and use of both B2C and B2B data. Non compliance with the GDPR can result in hefty fines of up to 4% of your annual turnover.

It's critical to ensure your IT infrastructure complies with the new regulations governing personal data.

If you need anymore information on GDPR, or you'd like to book an audit of your IT infrastructure then please contact us today.

How do you become compliant?

- ✓ Understand the GDPR legal framework
- ✓ Consider undertaking a full data inventory audit
- ✓ Update websites & privacy policies
- ✓ Full IT security review
- ✓ Put in place a data breach plan

For more information on GDPR Assistance, call us 01254 877009 | **www.use-it.co.uk**

Penetration Testing

We test for **technical vulnerabilities** that could be exploited.

Penetration testing, also referred to as pen testing, is a simulated real world attack on your network or an application that identifies vulnerabilites and weaknesses. The tests actively attempt to exploit any susceptibility to a company's infrastructure, applications, procedures, processes and people. We can then tailor strategic guidance on how to counter this exposure and risk.

Certified by mile**2**®
Cyber Security Certifications

"

Pen Tests are part of an industry recognised approach to both identifying and quantifying risk within an IT Infrastructure.

To learn more about pen testing call us on 01254 877009 | **www.use-it.co.uk**

How **vulnerable** are your systems to an **attack?**

Cyber Security Testing:

- ✓ Phishing attacks
- ✓ Social engineering
- ✓ Internal & external audit
- ✓ Staff training
- ✓ Risk & regulatory management
- ✓ PCI DSS compliance scan
